Professional Summary

Computer Science Engineering graduate skilled in Python, FastAPI, Django, REST APIs, and PostgreSQL. Experienced in Agentic AI, Machine Learning, full-stack development, and computer vision, with hands-on experience building AI-powered applications.

Technical Skills

Languages: Python
Backend: FastAPI, Django, Django REST Framework, REST APIs
Frontend: React, Tailwind CSS, HTML, CSS, JavaScript
Databases: PostgreSQL, SQLite3, pgvector, ChromaDB
Agentic AI: LangChain, LangGraph, LLMs, Swiggy MCP
AI/ML: Machine Learning, Gemini AI, Hugging Face
Computer Vision: OpenCV, Tesseract OCR
Libraries & Tools: NumPy, Pandas, Streamlit
Developer Tools: Git, GitHub, VS Code, pgAdmin, Playwright, SerpAPI

Projects

Scholar Sync **2026**
Python, FastAPI, PostgreSQL, React, Tailwind CSS, JavaScript
- Developed a full-stack academic platform for students to access marks, assignments, and announcements.
- Implemented role-based access control and REST APIs with PostgreSQL workflows for academic records and assignments.

Cracked Screen Detection **2026**
Python, FastAPI, React, OpenCV, Tesseract OCR, Hugging Face
- Built a mobile inspection system that processes videos and extracts representative frames for condition analysis.
- Implemented blur filtering, orientation detection, and side identification to reduce redundant frames.
- Integrated zero-shot models and LLM-based visual analysis to identify evidence of cracked screens.

BeanTheory Coffee E-Commerce Website **2026**
Python, Django, PostgreSQL, HTML, CSS, Bootstrap
- Developed an e-commerce website with authentication, product management, shopping cart, and payment integration.
- Integrated a Gemini AI chatbot, PDF invoice generation, email delivery, and an admin dashboard.

Professional Experience

Seasia Group of Companies **Jun 2026 – Present**
Trainee – Machine Learning / Agentic AI
- Developing an Agentic AI food recommendation system using Swiggy MCP, LangChain, and LangGraph to identify suitable food combinations based on user prompts.
- Working with ChromaDB and PostgreSQL with pgvector for vector storage and retrieval to support context-aware food matching.
- Developing a cracked phone detection system using Python, FastAPI, OpenCV, and Tesseract OCR to process inspection videos and select clear, representative frames.
- Integrating Hugging Face zero-shot models and LLM-based visual analysis to assess phone condition and detect screen cracks.

CS Soft Solutions (India) Pvt. Ltd. **Dec 2025 – May 2026**
Industrial Trainee – Data Science, Python, Machine Learning & AI
- Completed six months of industrial training in Python, Data Science, Machine Learning, and Artificial Intelligence.
- Developed BeanTheory, a coffee e-commerce application using Django and PostgreSQL, with authentication and product management.
- Integrated a Gemini AI chatbot, automated PDF invoices, and email delivery.

Education

Guru Nanak Dev University, Jalandhar, Punjab 2022–2026
B.Tech. in Computer Science and Engineering **CGPA: 7.91**

Kamla Nehru Public School, Phagwara, Punjab 2021–2022
Class XII (Non-Medical) **75.2%**

Kamla Nehru Public School, Phagwara, Punjab 2019–2020
Class X **82.4%**

Certifications & Achievements

- First Prize – Web Mania Inter-College Competition, March 2025.
- Third Prize –
- Third Prize –
- Participated December 2025.
